PLAYER COMPOSITE PERFORMANCE INDEX (PCPI)

The Player Composite Perfomance Index is a measure that combines the identified categories "percentage of competitors that a bowler has outperformed" within that category. The calculation of the PCPI categories are weighted as follows: TradAvg/Frame 17.5%, BakerAvg/Frame 17.5%, BKDBL% 15%, FILL% 15%, STRIKE% 15%, FirstBall9+% 10%, and FirstBallAvg 10%. A player that ranks first in a category is given a PCP of 100%. The PCP then is reduced as a % of the number of eligible bowlers for each positional change. The INDEX essentially calculates the percentage of bowlers that a bowler outperforms across the category weightings, it does not consider the magnitude in the actual category performance differences between athletes.
